

Electronic Equipment's Export From Honduras in 2024: The Brief Trade Overview

Electronic equipment's are a category of devices or apparatus that are used in different industrial sectors to control electrical power for performing various functions. It is essential for the generation and transformation of power while preventing electrical faults and short-circuits. Honduras has emerged as a leading exporter of electronic equipment in the international trade market due to the rapid growth in electrical machinery and equipment demands all over the world. Free trade agreements such as CAFTA-DR have been benefiting the overall export of electronic equipment to a huge extent. [Honduras Import Data](#) says that the competitive labor cost adopted by the government authorities and the closer proximity to the United States market have reduced the shipping cost.

The improved transportation infrastructure and the investment in development of the electronic manufacturing sector have resulted in an export rate value of electronic equipment from Honduras worth 2.1 billion US dollars in 2024. The growing e-commerce and strong export performance have created a global trade decorum, solidifying the country's position as a top trade hub. Subscribe to Import Globals, the Honduras import export data provider, to stay updated with the latest information regarding the export of electronic equipment from Honduras via the Honduras Trade Data.

WHY ARE ELECTRONIC EQUIPMENT A GLOBALLY TRADED COMMODITY?

Electronic equipment's are a globally traded commodity because it powers every modern industry, ranging from healthcare and telecom to transportation and daily consumer services. Different parts of electronic equipment are constructed and manufactured in different regions worldwide, which has driven the trade of electronic equipment worldwide. The lower labor costs in top marketing regions like China and Vietnam have increased the global trade essentials.

The technology specialization in top trade authorities like Japan, South Korea, and Taiwan has benefited the cross-border trade. The technological evolution of the manufacturing units and the developing economies has contributed to the upward trajectory in the export of electronic equipment worldwide. The free trade agreements also hold great significance in encouraging companies to further adopt different strategies to increase export revenue.

THE LEADING VARIANTS OF ELECTRONIC EQUIPMENT EXPORTED FROM HONDURAS

The gradually increasing global demand for electronic equipment has prompted Honduras to introduce diversification as per its manufacturing capacity in the export portfolio. According to the [Honduras Export Data](#), the top 10 leading variants of electronic equipment exported from the nation in 2024 are,

- Insulated electrical wire and cable—The annual valuation of Insulated electrical wire and cable exported from Honduras in 2024—765 million US dollars
- Electrical lighting and signaling equipment— The annual valuation of Electrical lighting and signaling equipment exported from Honduras in 2024—642 million US dollars
- Electric control panels—The annual valuation of Electric control panels exported from Honduras in 2024—524 million US dollars

- Wiring harnesses— The annual valuation of Wiring harnesses exported from Honduras in 2024—478 million US dollars
- Switches and circuit breakers— The annual valuation of Switches and circuit breakers exported from Honduras in 2024—392 million US dollars
- Electric motors—The annual valuation of Electric motors exported from Honduras in 2024—278 million US dollars
- Electric connectors and plugs—The annual valuation of Electric connectors and plugs exported from Honduras in 2024—242 million US dollars
- Printed circuit boards (PCBs)—The annual valuation of Printed circuit boards (PCBs) exported from Honduras in 2024—228 million US dollars
- Integrated circuits—The annual valuation of Integrated circuits exported from Honduras in 2024—189 million US dollars
- Transformers and inductors— The annual valuation of Transformers and inductors exported from Honduras in 2024—154 million US dollars

THE TOP 10 EXPORT TRADE PARTNERS OF HONDURAS

The country, to counter the global trade demands positively and to solidify its position among the other global competitors, has established a stable bilateral relationship with the topmost authorities. As per the **Honduras Customs Data**, the top 10 export trade partners of the nation for electronic equipment exported in 2024 are,

- United States—The total value of electronic equipment exported from Honduras to the United States in 2024—876 million US dollars

Top 5 variants of electronic equipment exported

- Industrial light fixtures
- Stage lighting
- Motion sensor lights
- Street lights
- Solar garden lights

- El Salvador—The total value of electronic equipment exported from Honduras to El Salvador in 2024—724 million US dollars

Top 5 variants of electronic equipment exported

- LED bulbs
- Fluorescent lamps

- Smart lighting systems
- Emergency lights
- Flashlights
 - Nicaragua—The total value of electronic equipment exported from Honduras to Nicaragua in 2024—658 million US dollars

Top 5 variants of electronic equipment exported

- Smartwatches
- Digital cameras
- Game consoles
- Headphones
- Smart speakers
 - Guatemala—The total value of electronic equipment exported from Honduras to Guatemala in 2024—549 million US dollars

Top 5 variants of electronic equipment exported

- Televisions (LED, OLED)
- Smartphones
- Tablets
- Laptops
- Desktop computers
 - Germany—The total value of electronic equipment exported from Honduras to Germany in 2024—378 million US dollars

Top 5 variants of electronic equipment exported

- Rotary actuators
- Solenoids
- Gear motors
- Motor starters
- Braking resistors

- Mexico—The total value of electronic equipment exported from Honduras to Mexico in 2024–276 million US dollars

Top 5 variants of electronic equipment exported

- DC motors
- AC motors
- Stepper motors
- Servo motors
- Linear actuators

- Netherlands—The total value of electronic equipment exported from Honduras to the Netherlands in 2024–265 million US dollars

Top 5 variants of electronic equipment exported

- Counters
- Limit switches
- Sensors (proximity, infrared, etc.)
- Encoders
- Servo drives

- Dominican Republic—The total value of electronic equipment exported from Honduras to the Dominican Republic in 2024–242 million US dollars

Top 5 variants of electronic equipment exported

- Programmable Logic Controllers (PLCs)
- Variable Frequency Drives (VFDs)
- Motor controllers
- Process controllers
- Timers

- Belgium—The total value of electronic equipment exported from Honduras to Belgium in 2024–187 million US dollars

Top 5 variants of electronic equipment exported

- Electric generators

- Circuit breakers
- Surge protectors
- Relays
- Transformers
 - Italy—The total value of electronic equipment exported from Honduras to Italy in 2024–165 million US dollars

Top 5 variants of electronic equipment exported

- Power supply units (PSUs)
- Uninterruptible power supplies (UPS)
- Voltage stabilizers
- Solar inverters
 - Battery chargers
